

Wednesday Challenge Form

Group Members: Hunter, Max, Alyssa

Problem Statement: Your math teacher says that you can either take a regular math class for an year or you can write 1 to a million by hand. What will you do/choose.

Approach: We just calculated the numbers and just basic math and figured out the number of days it will take. By sec, minutes, hour, days, etc.

Solution: We said that taking the class is a way better for it takes way longer to take to write one to a million.

Lessons Learned: Show all work!!!!!!
