

## Wednesday Challenge Form

Group Members: Group Moses

**Problem Statement:** Use team work to run a marble using pipes to the bucket. You cannot overlap, cant touch the other person's pipe to support it and we cannot make the other team member intentionally loose.

**Approach:** We stood in a line and the first few people had to run the marble and pass it to the next person or the person who was at the end who didn't have a pipe cause everyone had to at least get to pass the marble to the next person or finish the run.

**Solution:** We stood in a straight line toward the goal and just passed the marble one by one.

**Lessons Learned:** Never discourage people and just don't give up and keep trying.
