

Date:

Wednesday Challenge Form

Group Members: Alyssa, Cole, Will, Roy

Problem Statement: How many skateboards can one make out of a 5 by 5 foot wooden board.

Approach: So we calculated how many board can we make (single sheet) first. Then, we divided the layers by the amount of single sheet skateboards. Finally, we got the answer: 2 skateboards in total.

Solution: 2 skateboards

Lessons Learned: Calculate Well!
